

uniika nekst

Euromet cages for professional projection

UNIKA and NEKST are the innovative Rental, Stacking & Rigging Frame cage lines, adaptable to all existing projector models. They guarantee precision, safety and easy installation.

[Visit our website](#)

■ INSTALLATION

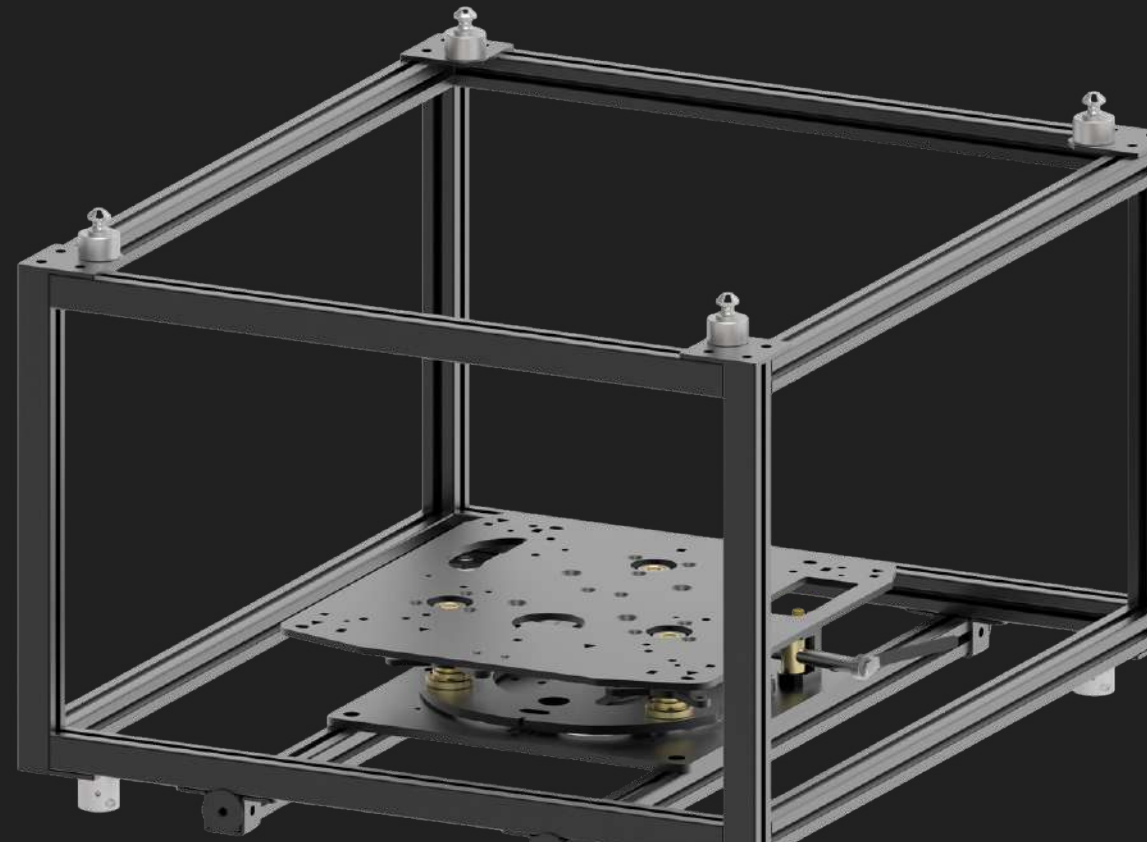

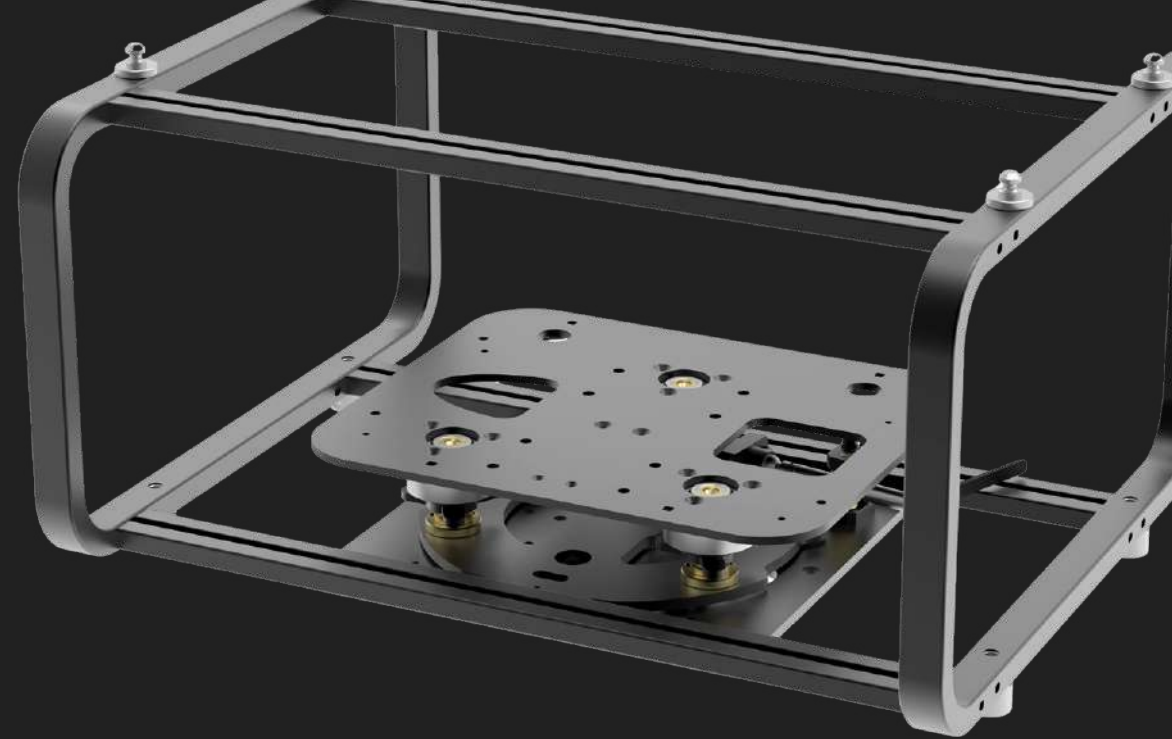

The modular system allows the cage to be installed in **any orientation**, on any type of truss and in any type of support.

■ FASTENING

The **easy coupling and uncoupling** of the internal calibration system simplifies and enables the most complex installations.

■ VIDEO PROJECTION

Internal adjustment supports the projector's zoom system and centre of gravity balance for a sharper image.

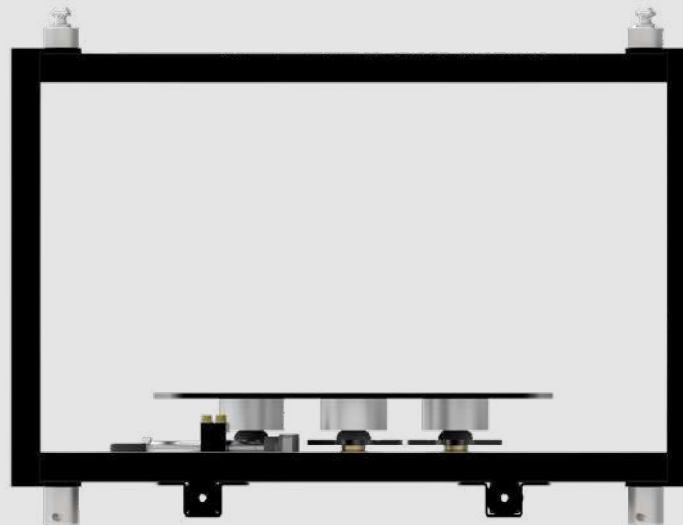

Universal cages suitable for every installation

Universal and adaptable cage for all major video projection brands.

■ It has a special and innovative structure that makes it **easily compatible with any type of projector.**

■ The professional projector cage compatible with a **wide range of accessories.**

■ It has a new adjustment and calibration system that ensures **quality and efficiency.**

■ It is the **new line of Stacking Frame Cages** developed and designed by EUROMET for projectors worldwide.

Installation example

The background of the image is a large screen displaying a complex network diagram. The diagram consists of numerous small, light-blue circular nodes connected by thin, light-blue lines, forming a dense, interconnected web. A ruler is placed horizontally across the middle of the screen, with the 'nekst' logo superimposed over it. The ruler shows measurements in inches and centimeters. The entire scene is dimly lit, with the screen being the primary light source. In the foreground, the silhouettes of several people are visible, looking towards the screen.

nekst

The evolution of the projector cage concept, for rental and events.

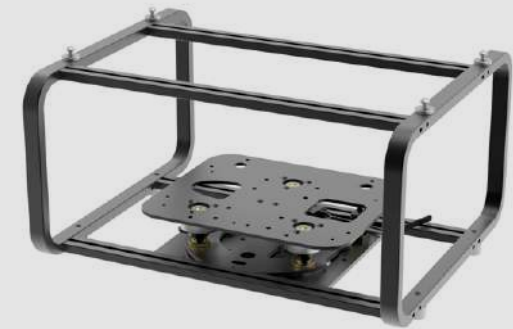

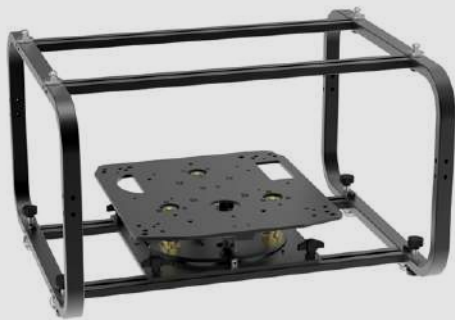

Cage for more **complex installations.**

NEKST E
EUROMET CODE 26500

Installation example

Various applications and special features.

■ INSTALLATION

Can be used without a cage to minimize space and shadows.

■ ADAPTABILITY

The cage can be moved for a better viewing point.

■ COMBINATIONS

With a single cage you can use multiple projectors together.

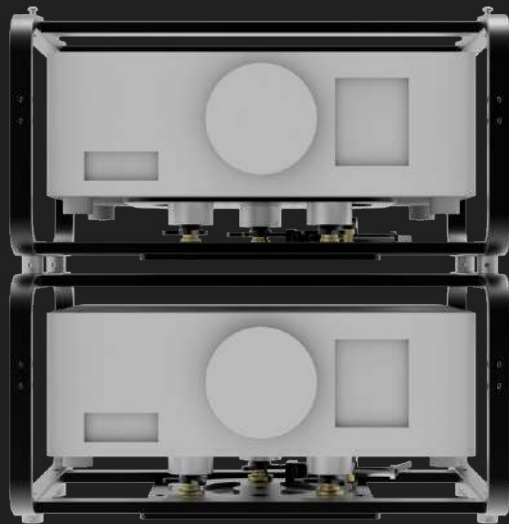

■ PROJECTION

Ensures a zoom effect by advancing the projector and therefore the focus.

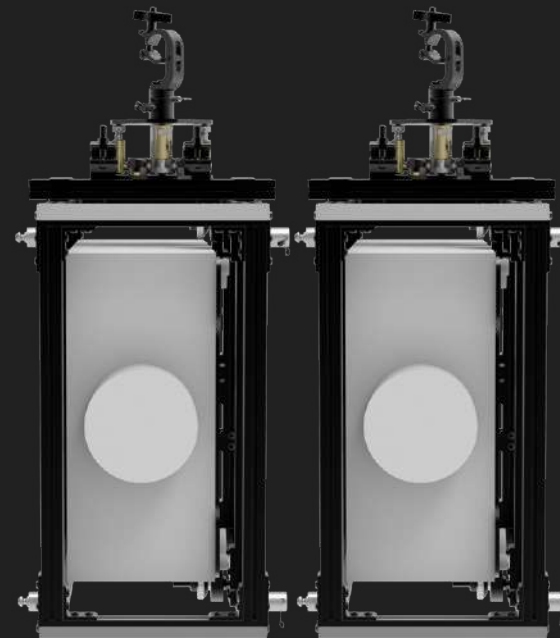

Various stacking possibilities.

The stacking possibilities are distinctive and multiple.

Both **Nekst** and **Unika** cages can be hooked in vertical, horizontal or supported mode, with different projection possibilities: floor, portrait and landscape.

■ Stacking landscape

■ Stacking portrait, floor or hanging from a trellis
