

Kite, professional projector support ceiling/truss with micro adjustment in 3 axes

Kite, professional projector support ceiling/truss with micro adjustment in 3 axes

SKU: 19567

Euromet's award-winning projector support lines, ARAKNO, KALIBRO, UNIKA and the newest KITE show once again the company's innovation and resourcefulness in designing projector systems.

The new KITE completes the support systems range for professional projectors while implementing the latest technology market requirements. It offers **a precise, quick and stable adjustment system thanks to its 3 calibration positions** for a better weight distribution and more stability as well as lightweight.

Its key accessory - [KITE ARM](#) - also enables different positions and complex orientation, while optimizing space and making any kind of projection possible: wall, portrait, truss or with extensions.

The KITE video-projector support **is equipped with a robust, resilient patented turned system.**

The micro-regulation adjustment can be done by:

- Hands
- Slider (included)
- Wrench (not included)
- Ratchet knob (optional)

**Compatible with these video projectors series:*

PT-RZ120 and similar

PT-RZ990 and similar

and similar

Adjustment

4 points

Specifiche

Material

Iron - Aluminum

Compatibility VESA	100x100 -screwed
Compatibility Clamp	150
Dimension	555x666x70/99 mm
Weight	9,50 kg
Pitch	+/- 7°
Roll	+/- 7°
Yaw	+/- 4°
Color	Black
