

Opera led wall 2 towers

Opera led wall 2 towers

SKU: 21161

Opera is the universal wheeled stand for large-sized LED structures.

Its modular structure makes it possible to support large LED-walls and move them easily, even on not perfectly smooth surfaces.

Its structure enables LED-wall installation right over the wheeled frame, thus highlighting linearity and impressiveness of the supported LED-walls

With the 2-tower structure it is possible to install up to 150" LED-walls.
