

Kometa Storm - Single Portrait

Kometa Storm - Single Portrait

P/N: 30006

Outdoor enclosure for Epson EB-XD2030 and similar projectors, equipped with an integrated cooling and heating system and designed to allow the projector to be positioned in portrait (vertical) mode.

The projector can be easily placed inside the box in the most convenient configuration for its use, ensuring compatibility with any type of lens.

The structure is stable and robust, specifically designed to allow for full wiring directly in the warehouse, enabling the system to be transported to the installation site in total safety and with maximum stability. The system is also pre-configured for the integration of a wide range of accessories and supports different types of installation.
