

K Bridge - Double bars 4 Clamps

K Bridge - Double bars 4 Clamps

P/N: 29760

Sliding Rail and Adjustable Anchor.

2 rails for accommodating 4 hydrofoils (clamps): the hydrofoils can slide freely lengthways along the profile and can be securely locked into the desired position.

Native integration with all Euromet RENTAL frame ranges, allowing all cages to be securely attached to the truss, both beneath the standard 300-sized truss and above it.

This attachment block is also designed to slide freely along the longitudinal axis and be secured at the required point.

It can also be positioned in two different positions

The rotation of the clamps also allows them to be attached to curved trusses

Every EUROMET product complies with the CE mark, with particular reference to standards IEC 60065, paragraph 19, and IEC 60950-1, paragraph 4.2.1, concerning the safety of suspended loads and the anti-tipping of floor-mounted supports.

Specifiche

Typology	Truss Mounts
Max Load	70 kg
Max dimension	400x80x40 mm
Weight	6,2 kg
Fixing screws	M6 M3 M4 M5
