IRIS – Iris Pro Line Stand – White

P/N: 29455

Accessory for the IRIS PRO line system
The mount allows for the installation of all major cameras and videoconferencing systems available on the market.
Installation is quick and easy, ensuring maximum safety for the camera positioned directly below the ALR screen, while also allowing for height adjustment. Camera cable management is simple and remains completely hidden within the structure.

It preserves the ability to lower the screen below a height of 180 cm, allowing for convenient transport between different rooms.
The system does not interfere with and maintains the perfect calibration of the projector across the various preset screen sizes.
This accessory remains compatible with all other accessories, such as mounts for videoconferencing systems and soundbars.

Colour options available: Black
