The new Euromet support can support monitors up to 90 inches vertically and horizontally.

EURO KIOSK is the perfect combination between the elegance of a large monitor stand and the convenience and safety of a KIOSK in which to install a large amount of technological hardware.

Inside it has a structure that can accommodate DYN bars in which to secure and tidy various hardware.

Everything is easily controlled thanks to the large upper door.

If necessary, this door can be safely closed using a key system.

Furthermore, the electric current part can be protected with a multi socket at the bottom, compared to isolating the upper part with a special partition.
