Categories: Advanced Kalibration Systems, Matrix, Nekst

K Bridge truss hanging accessories with 2 coamps for vertical projection.

- The portrait bar is a bar designed specifically for the NEKST line
- This bar makes it possible to project the projector vertically or portrait.
- This projection is very stable thanks to the balance on the center of gravity
- This bar requires the use of 2 clamps that can slide across the entire length of the bar
- The bar will provide a convenient fixing system on the NEKST cage itself
- The bar has the EXhagon as an accessory, thus also allowing installation via M tilt
