NEC: PX803UL - PX1004UL

HITACHI - LP - WU9100B

OPTOMA: ZU1050-860

OPTOMA: ZK1050

OPTOMA zu725t

BENQ - LU9715_9215_9915

BENQ - PU9730

SONY - FHZ 120L

Features:

- The cage allows the use of clamps directly in its structure, facilitating installation and speed of application
- The calibration system is given by the KITE system
- The system allows micrometric and calibrated adjustment in all 3 axes and calibrated rotation
- The Kite can also be removed using innovative captive screws
- The system can also be used without a cage to allow quicker installation or with the use of special lenses such as ultrashort lenses
- The kite can also be moved inside the cage allowing the adjustment of the zoom or center of gravity
- The cage also has a system of adjustable feet which allows for easy projection even when standing
- The "stacking" hooking system also allows you to position the projectors in stacking with each other
- The stacking system can be both in landscape but also in portrait or floor using the stacking systems and feet
- The shape of the cage also allows for ease of maneuvering and maintenance of the projector itself
- The cage can also be used in stacking with another kite, thus allowing a faster and more economical installation
