The Opera cart is also enriched with the new foldable line.

In this model the cart can easily be transformed into a floor stand by easily and safely removing the wheels.

In this way the use of the cart is much wider and easily adaptable to the needs of the external environment

The base without the wheels therefore reduces the overall dimensions of the cart to the maximum.

Furthermore, the rear part of the base, without the wheels, can also be lifted, completely reducing the rear space, allowing you to position the monitor flush with the wall, completely reducing the space in the room.

As with the entire Opera line, many accessories are also provided such as supports for soundbars, upper and lower.

As with all euromet supports, the OPERA line also includes the inclusion of a design RACK which can enrich the support shelf of the soundbar or cameras with other hardware components
