**Categories:** [Flat Panel Ground Mounts](#), [Flat Panel Mounts](#)

The **Opera TAU** stand features a new minimalist design while maintaining all the characteristics of solidity, flexibility, and modularity inherent to the original Opera line. It allows for stable and solid horizontal positioning of very large and heavy monitors.

The feet are positioned on the outer edges of the monitor, enabling:

- Alignment of 2 or more monitors, ensuring image continuity
- Minimization of obstruction for the user
- Maximum support base to enhance stability

The feet have a new tubular design and additional reinforcement at the base, ensuring maximum stability with high-quality lockable wheels. These features also allow for easy movement on uneven surfaces.

Its innovative monitor mounting system provides maximum flexibility along the horizontal axis, utilizing the entire length of the cart. Cable management can also be handled within the main tubes.
