Scenario carts collection is a classic from Euromet product line, now become also stand. To satisfy the need for stable supports and capable of accommodating bigger and fragile monitors Euromet designed a new double pole stand with aluminium bracket.

The self-regulating bracket system allows an easy alignment between different monitors.

The rectangular base stiffens the whole structure while the removable handles make the positioning considerably easy.

The stand profile results elegant and at the same time sturdy and reliable, it can hold monitors up to 110" at substantial heights both in portrait landscape position. The stand is available in black or white upon request.
